

AIRMAX ULTIMUM 41

The latest technology in air filtration

Pressure gauge and mounting bracket included

Automatic drain on air dryer

Low maintenance

Produces clean, dry and oil-free compressed air.

1. Extracts water and filters dust particles from 0.3 micron
2. Controls compressed air, ensuring an uniform pressure throughout the network
3. Eliminates 99% of the water contained in compressed air
4. Removes 99,9% of the oil contained in compressed air

Ideal for paint shops and body shops

Filters particules from 5 microns and regulates air pressure

Contaminated compressed air

Air Dryer
Removes 99% of water

Coalescing filter
from 0.3 micron

Clean and dry air

Legend

- Oil
- Dust
- Water
- Vapour
- Non-regulated compressed air

Also ideal for industrial applications:

- Plasma welding
- Any applications requiring clean and dry compressed air
